Abstract of **JP10301943**

PROBLEM TO BE SOLVED: To make it possible to sort the retrieved result of picture data while reflecting user's interesting level. SOLUTION: Information indicating picture data and the retrieving frequency (the number of votes) of retrieving the picture data are correspondingly stored in a picture managing data base(DB) 13 in each picture data managed in an image storage part 4. A retrieving condition is inputted from a user interface 1 and picture data corresponding to the inputted retrieving condition is retrieved. The number of votes corresponding to the retrieved picture data is acquired by referring to a picture managing DB 13 and picture data retrieved based on the acquired number of votes are sorted and displayed on a retrieved result informing part 12.
